

The First Cut Test.

One saw. Your worst material. Fresh water first, then dosed. The gauge does the talking.

The setup

Company

Saw or rig (make & model)

Your name

Blade or tooling

Phone

Material & thickness

Date

Product & Dosatron setting

Water

☐

Fresh

☐

Recycled

The cut

Same saw, same blade, same material. Change only the water.

	Fresh water	Dosed
Feed rate (in/min, or min per hole)		
Amps at the gauge (or fuel burned)		
Time for the cut		
Chipping / edge quality (1-5)		
Noise & vibration (1-5)		
Blade, bit, or tooth wear – notes		

The verdict

Faster by _____ x

What the crew said

Notes

Run by (signature)

Send results to Matt or Jeff – photo of this sheet is fine

If the gauge doesn't move, the test cost you nothing but an hour.
